NO.	NAME	HIGHEST QUALIFICATION	DESIGNATION
1.	MR. ABD RAZAK BIN HAJI MOHD YUSOFF	MASTER OF BUSINESS ADMINISTRATION	LECTURER
2.	MR. NORAZMI BIN OMAR	MASTER OF BUSINESS ADMINISTRATION	LECTURER

PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

- 1) knowledgeable, competent and innovative which will contribute towards the requirement of the human capital in chemical and/or process/food/polymer/bioprocess/environment engineering technology related industry.
- 2) Effective leaders with teamwork, skills as well as verbal and non-verbal interpersonal communications skill;
- 3) Committed towards the importance of lifelong learning and continuous improvements;
- 4) Professional, ethical, and socially responsible; and
- 5) Capable of embarking on business and technopreneurial activities.

PROGRAMME LEARNING OUTCOMES (PLO)

PLO 1	Apply knowledge of applied mathematics, applied science, engineering fundamentals and an engineering specialisation as specified in DK1 to DK4 respectively to wide practical procedures and practices in chemical and process/food/polymer/bioprocess/environment engineering technology.
PLO 2	Problem analysis: Identify and analyse well-defined engineering problems reaching substantiated conclusions using codified methods of analysis specific to their field of activity (DK1 to DK4).
PLO 3	Design/development of solutions: Design solutions for well-defined technical problems and assist with the design of systems, components or processes to meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations (DK5).
PLO 4	Investigation: Conduct investigations of well-defined problems; locate and search relevant codes and catalogues, conduct standard tests and measurements.
PLO 5	Modern Tool Usage: Apply appropriate techniques, resources, and modern engineering and IT tools to well-defined engineering problems, with an awareness of the limitations (DK6)
PLO 6	The Engineer and Society: Demonstrate knowledge of the societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering technician practice and solutions to well-defined engineering problems (DK7).
PLO 7	Environment and Sustainability: Understand and evaluate the sustainability and impact of engineering technician work in the solution of well-defined engineering problems in societal and environmental contexts.
PLO 8	Ethics: Understand and commit to professional ethics and responsibilities and norms of technician practice.
PLO 9	Individual and Team Work: Function effectively as an individual, and as a member in diverse technical teams.
PLO 10	Communications: Communicate effectively on well-defined engineering activities with the engineering community and with society at large, by being able to comprehend the work of others, document their own work, and give and receive clear instructions.
PLO 11	Project Management and Finance: Demonstrate knowledge and understanding of engineering management principles, business practices, and technopreneurial competencies, as well as identify business opportunities, and apply these to one's own work, as a member and leader in a technical team and to manage projects in multidisciplinary environments.
PLO 12	Life Long Learning: Recognize the need for, and have the ability to engage in independent updating in the context of specialised technical knowledge.

MPU2472 SPORTS MANAGEMENT 1
MPU2482 PERSONAL FINANCIAL MANAGEMENT 1
MPU24102 INTEGRITI & ANTI-RASUAH

MPU2313 AMALAN ISLAM DI MALAYSIA

Kursus ini membincangkan aspek-aspek amalan Islam yang diaplikasikan di Malaysia. Perbincangan ini meliputi konsep manusia dan agama, asas-asas Islam dan sejarah kedatangan agama Islam di Malaysia serta menerangkan keistimewaan Islam melalui institusi pendidikan, kekeluargaan, ekonomi dan pentadbiran di Malaysia. Di samping itu, perbincangan juga dilengkapkan dengan isu-isu semasa dalam masyarakat berlandaskan ajaran Islam.

Learning Outcomes:

Setelah tamat kursus ini, pelajar akan dapat:

1. Menghuraikan konsep manusia dan agama, asas-asas Islam dan sejarah kedatangan agama Islam di Malaysia.
2. Menguasai ibadat solat dengan betul, menghafal doa-doa selepas solat dan menghafal ayat-ayat al-Quran yang ditetapkan
3. Menerangkan keistimewaan Islam melalui institusi pendidikan, kekeluargaan, ekonomi dan pentadbiran di Malaysia
4. Menjelaskan isu-isu semasa dalam masyarakat berlandaskan ajaran Islam

MPU2323 RELIGIOUS PRACTICES IN MALAYSIA

This course enables students to understand their roles in developing the nation by exposing them to the influence of religions on the lives of Malaysians, Students should also be able to understand their roles as members of the society according to the constitutions of Malaysia.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the concept of man and religion
2. Describe the practices of religion as stated in Malaysian constitution
3. Explain current issues related to various religions practiced in Malaysia.

References:

1. Saw Swee-Hock (2015). *The Population of Malaysia (Second Edition)*, ISEAS Publishing, Singapore.
2. Mohd. Azizuddin Mohd Sani (2014), *Politics of Religious Expression in Malaysia*. ISEAS Publishing, Singapore.
3. Gerhard Hoffstaedter (2011), *Modern Muslim Identities: Negotiating Religion and Ethnicity in Malaysia*. NIAS Press.

MPU2213 BAHASA KEBANGSAAN (A)

Mata pelajaran Bahasa Kebangsaan (A) ini disediakan untuk mempertingkatkan kecekapan berbahasa, sesuai dengan intelek pelajar untuk berkomunikasi dengan berkesan secara lisan dan tulisan dalam konteks rasmi, kreatif dan bukan kreatif.

Learning Outcomes:

Setelah tamat kursus ini, pelajar akan dapat:

1. Mengetahui asal usul dan perkembangan Bahasa Melayu
2. Berkomunikasi secara lisan dengan berkesan dari segi sebutan dan intonasi,serta menggunakan struktur tatabahasa yang betul
3. Menghasilkan pelbagai jenis teks dengan bahasa yang betul dan berkesan serta mampu berkomunikasi secara lisan dan bertulis dalam pelbagai situasi.

4. Dewan Bahasa dan Pustaka (2007). Kamus Dewan. Edisi Keempat. Kuala Lumpur: Dewan Bahasa dan Pustaka, Kementerian Pendidikan Malaysia

MPU2232 INTERPERSONAL SKILLS

This course is aimed directly at fostering one's aspect of Interpersonal skills namely communication skills; leadership; teamwork; problem-solving and decision-making skills. Students' abilities to participate and interact with others effectively are addressed through individual tests and group projects.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply the principles of intrapersonal and interpersonal skills.
2. Communicate effectively using various communication media.
3. Demonstrate leadership and teamwork skills.

References:

1. Wood, J.T. (2016) *Interpersonal Communication: Everyday Encounters*. 8th Edition. Chapel Hill: University of North Carolina.

MPU 2133 BAHASA MELAYU KOMUNIKASI 1

Kursus ini melatih pelajar antarabangsa untuk berkomunikasi dalam bahasa Melayu asas yang meliputi situasi kehidupan harian. Pelajar akan diperkenalkan dengan pertuturan dan penulisan bahasa Melayu mudah. Pengajaran dan pembelajaran akan dilaksanakan dalam bentuk kuliah, tutorial, tugas dan pengalaman pembelajaran pelajar di dalam dan di luar kelas. Pada akhir kursus ini, pelajar diharapkan dapat berkomunikasi dan menggunakan ayat mudah dengan berkesan.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Menerangkan kandungan teks penuh yang menggunakan ayat mudah dan ayat berlapis..
2. Bertutur dalam pelbagai situasi dengan menggunakan ayat mudah dan ayat berlapis;
3. Menyusun idea secara kreatif dan sistematik dalam penulisan karangan pendek.

4. Siti Hajar Abdul Aziz. 2008. Siri Pendidikan Guru Bahasa Melayu I. Shah Alam: Oxford Fajar Sdn. Bhd.

MPU 2163 PENGAJIAN MALAYSIA 2

Kursus ini membincangkan Sejarah dan Politik, Perlembagaan Malaysia, Sistem dan Struktur Pentadbiran Negara dan Agama Kepercayaan. Kursus ini adalah bertujuan untuk melahirkan graduan yang mempunyai identiti kebangsaan dan semangat patriotisme yang unggul. Pengajaran dan pembelajaran akan dilaksanakan dalam bentuk kuliah, tugas, peperiksaan dan pengalaman pembelajaran.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Menghurai dan membahaskan kepelbagaian dalam masyarakat.
2. Mengulas kepentingan identiti kebangsaan ke arah mengukuhkan semangat patriotisme.
3. Membina dan memupuk hubungan dan interaksi sosial dalam kalangan pelajar.

MPU2412 CAREER GUIDANCE 1

This course is one of the co-curriculum modules offered to develop well-rounded individuals through involvement in social and community activities. Specifically, it enables student to understand the important of career planning. It also promotes soft skills that can be applied in their future careers. Apart from that, it creates a better understanding about potential employers' expectations in job hunt.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply appropriate interpersonal skills in building up their own towering personalities
2. Differentiate their self-concept and self-image which reflect their personalities
3. Demonstrate ability to plan their future career and targets.

References:

1. Devito, J. A. (2013). The interpersonal communication book (13thed.). U.S.A. Pearson

3. James A. Athanasou & Raoul Van Esbroeck (2008). International handbook of career guidance. Springer.

MPU2422 COMMUNITY SERVICE 1

This course is one of the co-curriculum modules offered to develop well-rounded individuals through involvement in social and community activities. Specifically, it aims to develop interest among the students to participate in community programs. It also enables student to understand the important of performing of community services and the ways to implement the programmes and activities. Besides that, it provides better understanding to the student on the values, ethics and benefits of carrying out community service programmes.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Organize ad participate in the community service programmes and activities.
2. Apply knowledge gain in carrying out community service programmes and activities
3. Apply basic entrepreneurship skills in community service programmes and activities
4. Explain the values ethics and benefits of carrying out community service programmes.

MPU2432 CULTURE 1

This course is one of the co-curriculum modules offered to develop well-rounded individuals through involvement in social and community activities. Specifically, it aims to develop students' personalities and social interaction skills, as well as foster closer relationship among the student in the university through the organization of and participation in cultural activities.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply knowledge gained in planning and organizing a cultural event.
2. Apply appropriate skills in participating in a cultural event.
3. Explain the benefits of participating in a cultural activity.

MPU2442 RAKAN MASJID 1

This course is one of the co-curriculum modules offered to develop well-rounded individuals through involvement in social and community activities. Specifically, it aims to develop students' who understand their roles as Muslims and are responsible to develop the ummah. This course also aims to expose students to the function of mosque as the main institution in developing the Muslim society.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the beauty of Islam in every aspect in their life.
2. Demonstrate several activities in relation to the Muslim practice.
3. Discuss the significance of the organized activities in the course.

MPU2452 SISWA-SISWI BOMBADAN PENYELAMAT 1

This course is one of the co-curriculum modules offered to develop well-rounded individuals through involvement in social and community activities. Specifically, it gives exposure on the introduction to Malaysian Fire Rescue Department, foot marching techniques, fire rescue, ascending and descending technique and basic emergency aid.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Participate actively in Project (theory and practically about BOMBA activities).
2. Communicate and demonstrate leadership and team skills through BOMBA activities (rescue, fire rescue and first aid).
3. Apply appropriate fundamental of rescue, fire rescue and first aid.

3. Akademi Bomba & Penyelamat Malaysia. 2012. *Kawad Operasi Kebombaan*. Jabatan Bomba dan Penyelamat Malaysia: Kuala Lumpur.

MPU2462 SISWA-SISWI PERTAHANAN AWAM 1

Kursus ini memfokuskan perbincangan tentang peranan dan fungsi Angkatan Pertahanan Awam dan mengaplikasikan ilmu pengetahuan dalam pertolongan cemas, dan kawad kaki. Melalui aktiviti seperti ini, pelajar dapat membuat perancangan, pelaksanaan tugas, pertolongan kecemasan dan aktiviti kebakaran.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Memberi peluang kepada pelajar mendapat pengetahuan dan kemahiran untuk membantu diri sendiri dan orang lain
2. Memupuk nilai/sikap hormat menghormati, menurut perintah, berdisiplin, bekerjasama, bertanggungjawab, berhemah, kejujuran, keyakinan diri dan kepimpinan
3. Menanam semangat kesedaran sivik, ketaatan dan cintakan negara serta penjagaan alam sekitar
4. Mempertingkatkan ketahanan fizikal, mental dan daya kerohanian yang seimbang.

MPU2472 SPORTS MANAGEMENT 1

This course is one of the co-curriculum modules offered to develop well-rounded individuals through involvement in social and community activities. Specifically, it aims to provide students with adequate information and understanding on the implementation and rules in sports management. This course also explores various aspects of sports management namely scope, basic principles, technique and current issues pertaining to sport management.

Learning Outcomes:

Upon completion of this course students should be able to

1. Prepare document in order to organize competition.
2. Apply knowledge gained by managing competition.
3. Participate and evaluate the benefits of participating in lecture or practical class related to sport, recreation and leisure.

References:

2. Milena Parent & Sharon Smith-Swan (2012). *Managing Major Sport Events Theory & Practise*. Routledge Taylor & Francis Group.

MPU2482 PERSONAL FINANCIAL MANAGEMENT 1

This course is to educate students on personal financial education. It is to open their minds to things that they should be prepared for financially when they enter the competitive job market. The course explains what they should start doing early in their life to achieve their financial dreams.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply the concept of financial planning, building financial wealth and avoiding financial troubles.
2. Plan and execute financial planning events at campus level.
3. Describe the program implementation.

References:

1. AKPK (2011). *Power!* Kuala Lumpur : Agensi Kaunseling dan Pengurusan Kredit
2. AKPK (2010). *Money Sense: Getting Smart with Your Money*. Kuala Lumpur: Agensi Kaunseling dan Pengurusan Kredit.

MPU24102 INTEGRITI & ANTI-RASUAH

Kursus ini merangkumi konsep asas tentang nilai integriti, bentuk pelakuan rasuah, salah guna kuasa dalam kehidupan seharian dan organisasi serta kaedah pencegahan rasuah, isu dan kes rasuah sebenar dibincangkan dalam sesi pembelajaran.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Menghuraikan nilai integriti dalam kehidupan seharian.

2. Menilai bentuk perlakuan rasuah dan salah guna kuasa dalam kehidupan dan organisasi
3. Mempamerkan nilai integriti dan pencegahan rasuah melalui aktiviti masyarakat

WED 10402 COMPETENCY ENGLISH

This course focuses on both receptive (reading) and productive (speaking & writing) skills as well as grammar skills. It serves to enhance and strengthen students' proficiency in English. Assessments will be task-based where stimulating exercises and group activities will be employed to motivate students to use the language confidently in various situations..

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply correct grammatical components in written form.
2. Express themselves effectively using appropriate language skills through discussion and presentation.
3. Analyze linear and non-linear comprehension texts using appropriate reading skills.
4. Produce written work using correct writing techniques.

3. .Yat, C.W. (2015). *Ace Ahead MUET*. Kuala Lumpur: Oxford University Press.

WED 20202 COMMUNICATION ENGLISH 1

This module is to enhance students' acquisition of English through language enrichment activities. The module enables students to enhance their English language proficiency through written work and oral communication. Students also engage in exploring and responding to ideas through group discussion and conducting a project. Students are then exposed to the fundamentals of presentation skills..

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply correct grammatical skills in written form.
2. Produce professional business correspondence documents
3. Organise an event through conducting a group discussion, writing a proposal, presenting and executing the event.

References:

3. Guffey, M. E. & Loewy, D. (2013). *Essentials of business communication*. Mason, Ohio: South-Western Cengage Learning.

WED 20302 COMMUNICATION ENGLISH 2

Students are exposed to fundamental writing skills that focus on academic writing. They are also exposed to language structures. In the second part of the course, students are guided to undertake academic writing assignment with consultation and previous writing assignment. In the last part of the course, students need to present based on the academic writing assignment using the learnt presentation skills.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Use appropriate mechanics in writing effectively.
2. Produce essay using mechanics of writing techniques.
3. Prepare academic report by incorporating relevant academic resources.
4. Present Information using effective presentation techniques

WMD10101 MANDARIN 1

This course introduces the basic grammatical structures of Chinese sentences to acquire the basic oral and written communication skills. The contents of this course are Chinese writing system (including Pinyin), numbers, useful Chinese expressions to greet others, to introduce oneself and family members, date, time, food and beverages.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Use words & phrases in Pinyin system and/or Chinese characters.
2. Practice basic Chinese language for daily communication within the limits of vocabularies and sentence structures acquired in the course,.
3. Perform learned Chinese vocabularies, phrases or short sentences in limited contexts.

WMD10201 MANDARIN 2

This course introduces the basic grammatical structures of Chinese sentences in order to acquire the basic oral and written communication skills. The contents of this course are useful expressions in Mandarin to activities in university, hobby and interest, shopping and purchases, locations, direction, seeing a doctor and holiday activities.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Use Chinese words, phrases, short sentences about learned topics.
2. Practice Chinese language for daily communication within the limits of vocabularies and sentence structures acquired in the course.
3. Perform learned Chinese vocabularies, phrases or short sentences in various contexts.

WAD10101 ARABIC 1

Rationale for inclusion of the course in the program:

This course is intended to expose the student with conversation skill of beginner-level Arabic language. Students will be familiarized with elemental Arabic grammar and be able to construct a Arabic report and essay. This course seeks to develop passion of students to the course, alphabetical, vocabulary, industrial terms, nouns, verbs, basic grammar and explain the benefit of learning Arabic to the students. Student are also expected to be able to write an Arabic sentences.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain basic Arabic grammar within the scope of the course.
2. write basic Arabic sentences and questions based on what they have learnt in the course.
3. Communicate orally in Arabic at a beginner's level.

3. Othman bin Arifeen, Dr. Mohd Phuzy Usop (2014). *learn Arabic by yourself (Book 6)*, Al-Hidayah Publication, Batu Caves Selangor

WAD10201 ARABIC 2

Rationale for inclusion of the course in the program:

This course is intended to familiarize students with conversational skills in Arabic at a beginner level. It exposes students with basic Arabic grammar in order to enhance their ability to construct a report and essay in the language. This course seeks to develop passionate and self-motivated students of Arabic by enhancing their basic grammatical knowledge in the language as well as their knowledge of daily and industry focused terms and phrases in an Arabic-speaking setting.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Produce written work using Arabic knowledge and skills learnt in the course.
2. Communicate in basic Arabic language in written and verbal form.
3. Prepare project using content and skills learnt in the course.

References:

1. Amazing Bahasa Arab, Nur Aina Sabariah Md Isa, Akram Hijri Abdullah Akhill, Mohd Aminuddin Ab Rahaman. Oxford Fajar (2017)
2. Mustafa Umar, Perbualan Bahasa Arab, (2012), Darul Nu'man, Kuala Lumpur
3. Othman bin Arifeen, Dr. Mohd Phuzy Usop (2014). learn Arabic by yourself (Book 6), Al-Hidayah Publication, Batu Caves Selangor

WBD10102 INTRODUCTION TO ENTREPRENEURSHIP

This course aims to prepare students with the main characteristics of an entrepreneur and provide basic knowledge and skills in establishing a small venture.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Describe entrepreneurship value and culture
2. Demonstrate the ability to assess business environment
3. Identify entrepreneurship opportunity and explain the process in starting up a business
4. Develop a business idea and participate in entrepreneurship activities

References:

WID41009 INDUSTRIAL TRAINING

This course exposes students to real industrial environment and gives them the opportunity to practice the knowledge and skills they have acquired during their academic years.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Demonstrate the right work manner and attitude with deliberation on safety and health in a working environment.
2. Perform tasks with minimum supervision and meet the company's expectations.
3. Apply technical knowledge, analytical and problem-solving skills to accomplish task assigned by the company.
4. Report effectively on work experience during attachment, including knowledge and skills acquired, in oral and written form.

WQD10103 TECHNICAL MATHEMATICS 1

This course enhances students' fundamental knowledge of solving indices, logarithms and algebra, and to enrich students' knowledge of trigonometry and complex numbers. These concepts are essential for their study in higher level of mathematics.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Solve operations and problems related to algebra (C2, PLO1).
2. Apply trigonometric functions in solving triangular problems (C3, PLO1).
3. Solve complex number operations in several forms (C2, PLO1).

4. Peterson, J. 2012. Technical Mathematics (4th Edn). Delmar Cengage Learning: New York.

WQD10203 TECHNICAL MATHEMATICS 2

This course provides fundamental concepts of calculus where students will be exposed to the theories and applications of trigonometry, functions, limits, differentiation and integration. These are essential mathematical components which students will encounter in science and engineering technology courses during their academic programme.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Solve trigonometry equations (C2, PLO1).
2. Solve operations and problems related to functions (C2, PLO1).
3. Apply differentiation and integration techniques to solve practical problems (C3, PLO1).

References:

1. Mathematics Central Committee Universiti Kuala Lumpur. 2012. Technical Mathematics 2 Workbook (Modules Prepared by MCC UniKL). Pearson Custom Publishing: Singapore.

4. Peterson, J. 2012. Technical Mathematics (4th Edn). Delmar Cengage Learning: New York.

CLD 21102 STATISTICS

This course is aimed at introducing students to basic language of statistics and to apply statistical concepts in engineering. Students will be exposed to selecting, computing and interpreting basic statistical tools.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Illustrate and explain a descriptive and inferential statistics for interpreting results (C3, PLO1).
2. Apply appropriate statistical models or methods to solve statistical problems (C3, PLO2).
3. Interpret the outcome from statistical software output with the statistical concept (C4, PLO3).

CLD10003 GENERAL CHEMISTRY

General Chemistry provides fundamental knowledge in chemistry. This course will equip students with essential knowledge that will enable them to be used and applied in chemical engineering technology and any related application. Students will also be exposed to basic laboratory skills including tools, chemicals, techniques and safety awareness.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply knowledge on solving problems related to basic principles of chemistry. (C3, PLO1)
2. Handle chemicals and apparatus correctly and properly in the application of basic principles of chemistry during laboratory sessions. (P3, PLO4)
3. Perform effectively as a team member in applying good laboratory techniques (A3, PLO9)

CLD10803 ORGANIC ANALYTICAL CHEMISTRY

This course provides students with the basic concepts in organic chemistry as well as the analytical techniques used in the field of chemistry.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply the phenomena, basic concepts, laws and principles in organic and analytical chemistry (C3, PLO1).
2. Perform laboratory works related to reaction of organic compound (P4, PLO4)
3. Assist affectively as a team member in performing good laboratory technique (A3, PLO9)

4. Skoog, D.A., Holler, F.J. and Crouch, S.R. (2017), *Principles of Instrumental Analysis*, 7th Edition, Cengage Learning

CLD20002 OCCUPATIONAL SAFETY AND HEALTH

This course will impart knowledge and create an awareness to occupational safety and health. Students will be exposed to the design, techniques, legal, society and cultural issues in making the work place as safe as possible.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Illustrate the ability to recognize the types of Hazards, the appropriate Control Measures and risks associated with it, in accordance to Occupational Safety & Health Act (1994) or ACT 154 towards Safety and Health Issues at Workplace (C3, PLO6).
2. Collaborate with Team Members in carrying out activities related to Occupational Safety and Health (P2, PLO9)
3. Demonstrate business practices and opportunities as well as technopreneurial competencies to all work activities related to Occupational Safety And Health (P2, PLO11).

CLD20402 TRANSPORT PROCESS

This course will provide students with the knowledge of heat and mass transfer which will be useful for their study in later years.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain knowledge of three modes of heat transfer which are conduction, convection and radiation (C2, PLO1)
2. Apply basic calculation in solving problems related to heat transfer (C3, PLO2)
3. Perform laboratory works safely according to the related operating manual (P3, PLO4)

CLD10703 ENGINEERING DRAWING AND COMPUTING

This introductory course aimed at providing students with the basic concepts of computer applications used in the current practice and its application in chemical engineering technology. This course will equip students with concepts and knowledge that are essential to encounter any related problems that need to be solved using a computer application including using computer for engineering design.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply theoretical knowledge of computing application in current practice and its application in chemical engineering technology. (C3, PLO3)
2. Reproduce 2D models using basic symbols used in computing and engineering drawing. (P3, PLO4)
3. Construct a piping and instrumentation diagram by using CAD software. (P3, PLO5)

CLD10502 PRINCIPLES OF CHEMICAL PROCESS

This is an introductory course aimed at providing students with the fundamental concepts of chemical process which form the foundation for their study in later years. These concepts are essential in preparing students to formulate and solve material and energy balances on chemical process systems.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Identify the dimension of an equation and unit conversion (C2, PLO1).
2. Apply the concept of material balances and energy balances in chemical process plants (C3, PLO3).
3. Solve material balances and energy balances to account for the flows to and from the process and its units. (C3, PLO2).

CLD10603 FLUID MECHANICS

This course is an introduction to fluid mechanics and emphasizes fundamental concepts and problem-solving techniques. Topics to be covered include fluid properties, pressure, fluid static's, control volume analysis and internal flow (flow in pipes and conduits). Students will be familiarized with the equipment involved in fluid flow. The student will also be able to evaluate basic concepts in selecting and analyzing components of fluid systems

Learning Outcomes:

Upon completion of this course students should be able to:

1. Assess the basic theory of fluid in solving problems related fluid static and dynamic (C3, PLO1)
2. Discuss the concepts of static and dynamic fluid and its application in fluid system (C2, PLO2)
3. Conduct laboratory experiments related to fluid static and dynamic by following standard operating procedure and safety awareness (P3,PLO4).

CLD20102 ELECTRICAL TECHNOLOGY

This is an introductory course aimed at providing students with the fundamentals concept and knowledge of electrical technology. This course will provide students with skills and understanding to operate electrical tools and machines safely and effectively.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Describe basic principles and practices from electrical fundamental disciplines to solve electrical problems. (C2, PLO1)
2. Perform experiments and project according to the standard operating procedure given. (P4, PLO4)
3. Apply basic principles of electricity, circuit theorems, electrical system, magnetism, and electrical machinery. (C3, PLO2).

References

7. Lecture Notes: Electric Circuits – Network Theorems.

CLD20202 PROCESS INSTRUMENTATION

This course will impart knowledge and application of process instrumentation. Students will be exposed to the principle and application including the maintenance, troubleshooting and safety aspects of process instrumentation.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the working principle, maintenance and troubleshooting procedures of the measurement devices (C2, PLO1).
2. Relate the application of instruments in the real plant/factory (C3, PLO2)
3. Display the ability to conduct the experiment by following standard operating procedure and safety awareness (P2, PLO4).

CLD20302 THERMODYNAMICS

This is an introductory course aimed at providing students with the fundamental concepts in thermodynamics. These concepts are essential since the students will apply this knowledge in other engineering courses.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Identify the thermodynamics properties of pure substances using properties table (C2, PLO1)
2. Describe the applications of thermodynamics (C2, PLO3)
3. Relate the closed and open system in the First Law and Second Law of thermodynamics. (C3, PLO2)

CLD20502 BASIC ENGINEERING WORKSHOP

This is an introductory course aimed at providing students with the basic mechanical engineering workshop practice. Students will be familiarized with basic principles and practical of hand tools in basic engineering workshop. The student also will be able to perform basic machining operation and basic welding operation

Learning Outcomes:

Upon completion of this course students should be able to:

1. Differentiate various tools, equipment and safety awareness in metal fabrication, machining and welding activities. (C4, PLO1).
2. Perform metal fabrication, machining, and welding process by using suitable tools and equipment. (P3, PLO4).
3. Work effectively in a team either as a leader or team member (A2, PLO9).

5. Erik Oberg, Franklin D. Jones, Holbrook L. Horton, Henry H. Ryffel, (2016) *Machinery Handbook*, 30th ed., Industrial Press

CKD20003 REACTOR TECHNOLOGY

This course will impart knowledge of chemical reaction. Students will be exposed to chemical kinetics, different reactor operations, catalysis and catalytic reaction.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Describe the concept of chemical kinetics and the importance of catalyst in chemical reaction (C2,PLO1)
- 2.Solve problems related to chemical reaction and reactor design based on the concept of chemical kinetics (C3, PLO2)
- 3.Conduct experiments on chemical reactors safely based on procedures (P3, PLO4)

4. Hill, C. G. (2014), *Introduction to Chemical Engineering Kinetics & Reactor Design*, 2nd Edition by New York, John Wiley & Sons

CKD20103 SEPARATION TECHNOLOGY

This course will provide students with the basic principle and operations of separation in chemical engineering technology and expose students to separation technology equipment.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the basic principles and operations in chemical and mechanical separation (C2, PLO1)
2. Apply the fundamental knowledge in separation technology process (C3, PLO2)
3. Perform laboratory experiments safely (P3, PLO4)

- 4.

CPD39806 FINAL YEAR PROJECT

This course introduces students with ability and skills in conducting a technical project based on their specialization area. It provides students with technical writing and presentation skills.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Plan the project activities to fulfil the proposed research problem.
2. Manage and execute the project plan to accomplish project objectives.
3. Analyse project results using appropriate technique or tools.
4. Produce a project report in accordance with the specified standard format.
5. Present and defend the project outcomes effectively.

DIPLOMA IN CHEMICAL ENGINEERING TECHNOLOGY (FOOD)

R/524/4/0038 / MQA A10857

PROGRAMME OVERVIEW

This programme focuses on the application of principles of chemical engineering technology and food chemistry to the large-scale processing of food. Foods must be nutritious, i.e., provide the essential nutrients for growth and health; they must be safe, free from dangerous micro-organisms and chemical contaminants; and, if they are to be consumed at all, they must be attractive in taste and appearance. In this programme, students learn how to adapt the unit operations of traditional chemical engineering to the specific requirements of food processing. The main objective of this programme is to make it possible for well-trained chemical engineers and technologists to work in the food industry, possibly one of the largest manufacturing industries in Malaysia.

The programme includes exposure to areas of food chemistry, food microbiology, food engineering, food safety, food processing and the nutritive value of food. It is also designed to provide depth and breadth in the relevant physical and biological sciences in which food science and technology is based.

CAREER PATH

Our graduates have unlimited opportunities in getting jobs either in public or private sectors. In public sectors, they may work at food related government bodies like Department of Health, Educational Institutions, MARDI, SIRIM, MPOB, and others. They may join various industries like cereal manufacturing, bakery products, sugar refinery, manufacturing of flour-based sweetening agent, chocolate and confectionery products, fish processing, milk and dairy products, fruits and vegetable products, canning industry, edible oils and its products and beverages.

The scope of career may vary from production supervisors, quality assurance supervisors, technicians, assistant chemist, R&D assistants, operators, and others.

COURSES

Diploma in Chemical Engineering Technology (Food)

CFD20103 FOOD PROCESSING TECHNOLOGY

CFD20203 FOOD MICROBIOLOGY

CFD20302 FOOD CHEMISTRY

CFD20403 FOOD QUALITY AND SANITATION

CFD30003 FOOD ANALYSIS

CFD30103 FOOD PACKAGING

CFD30303 SENSORY EVALUATION OF FOOD

CFD20103 FOOD PROCESSING TECHNOLOGY

To impart knowledge and technical skills in processing and preservation technology of various food products.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the principle of food processing techniques applied at low, ambient or high temperature and the effect of processing techniques towards food products/ingredient. (C3, PLO1)
2. Demonstrate the working principle of food processing equipment/machinery and the ability of handling and troubleshooting of the equipment/machinery. (P3, PLO5).
3. Work with team members in planning, performing and reporting a scientific inquiry, practical or assignment related to new innovative food product and food processing technology. (A3, PLO9)

CFD20203 FOOD MICROBIOLOGY

This course aimed to provide the students with understanding of the basic function, activity, classification of microorganisms, microbiological quality of food products and food safety. The student will also obtain a good understanding of laboratory practices in food microbiology.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply theories and concepts of microorganisms and their factors that influence microbial growth in food applications, food spoilage, food intoxication and food infection (C3, PLO1).
2. Organize important technique and analysis in food microbiology (P3, PLO5).
3. Perform a scientific inquiry on food microbiology with team members. (A2, PLO9)

5. Jeffrey L. Kornacki (2010). *Principles of Microbiological Troubleshooting In the Industrial Food Processing Environment*, Springer

CFD20302 FOOD CHEMISTRY

This course aimed to provide the students with understanding of the fundamental concept of chemical properties and reactions in food.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the structure, properties and functions of food constituents and other food additives (C2, PLO1).
2. Compute scientific inquiry/assignment related to food chemistry (C3, PLO2).
3. Collaborate with team members in planning and performing scientific investigation (A3, PLO9).

6. Belitz, H.-D., W. Grosch, and Peter Schieberle. (2004). Food Chemistry, 3rd edition. Berlin: Springer

CFD20403 FOOD QUALITY AND SANITATION

To provide students with knowledge of the importance of quality assurance and quality control in food industries, basic quality problems of food products, and knowledge of various quality management system that commonly applied in food industries and to provide students with knowledge on the principles and application of food hygiene in food manufacturing.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Describe the principles, practices and basic quality problems of food products in food industry (C2, PLO1).
2. Determine the suitable monitoring and control system to ensure it operates at its full potential to produce conforming product based from statistical methods (C4, PLO2).
3. Collaborate with team members in planning and performing scientific investigation (A2, PLO9)

5. Andres, J.V. *Quality Assurance for the Food Industries - A Practical Approach*, CRC Press, 2004.

CFD30003 FOOD ANALYSIS

This course will provide the principles of chemical and instrumental analysis of food and provide laboratory experience for students.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the principles and procedures of chemical, physical and instrumental analysis in food analysis (C2, PLO1).
2. Perform food sampling and food analysis using a related food instrument (P4, PLO5).
3. Collaborate with team members in planning, performing and reporting a scientific inquiry/assignment related to food analysis (A2, PLO7).

CFD30103 FOOD PACKAGING

To provide students with the principles of food packaging and application of packaging materials in food industry as well as packaging regulation and labelling requirement to be in line with Malaysian Food Act 1983 and Food Regulation 1985.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Explain the principles of food packaging and application of packaging materials in food industries (C2, PLO1).
2. Demonstrate the typical packaging materials testing and some major packaging equipment (P3, PLO5).
3. Collaborate with team members in reporting the experimental results/assignment given (A3, PLO9).

References:

1. Robertson, G.L Food Packaging Principle and Practice Third Edition, CRC Press Taylor and Francis Group (2013)

3. Laws of Malaysia: Food Act and Regulations, MDC Publishers Sdn. Bhd. (2015).

CFD30303 SENSORY EVALUATION OF FOOD

To provide students with the basic principles and requirements and sensory evaluation.

Learning Outcomes:

Upon completion of this course students should be able to:

1. Apply the appropriate techniques and methods of sensory evaluation for product development (C3, PLO1).
2. Conduct appropriate statistical methods for product development and quality assurance of food (P3, PLO5).
3. Describe the principle steps in market research (A3, PLO11)

Total Credit to Graduate (TCG): 94

*** Applicable for Malaysian Students**

Students must register and pass subject MPU3213 Bahasa Kebangsaan A before graduation if attain grade D and E in Bahasa Melayu at SPM level and never passed Bahasa Kebangsaan A in their previous programme. Other conditions: refer to your Academic Advisor. Students under this category will graduate with additional of 3 credits on top of TCG.

* Passing mark for all MPU Compulsory subjects is 50 marks (C).
